

**TECHNICAL
SPECIFICATION**

**FLUTED MEDIA - CHEMICAL FILTERS
(Patented Technology)**

THE **ECCSCRUB** FLUTED MEDIA CHEMICAL FILTERS COMES WITH THE FOLLOWING OUTSTANDING FEATURES

- * **High efficiency and reliability**
- * Made of inorganic fibre/fire resistance media.
- * Fluted media with open channels.
- * Superior technology as compared to granular packed bed filter
- * Designed for higher air flows thus requires much lower face area.
- * Very Low pressure drops (Aprx. 22mm WC at 500 FPM)
- * Longer service Life
- * Easy to handle due to lower weights.
- * Controls Air Borne molecular contaminants
- * Can be stacked side by side and or up/down to make the necessary sizes
- * Variety of chemical combinations for wider applications
- * No special add on/after filter since there is no attrition/powdering hence much lower system pressure drop.

STANDARD SIZES:

W	H	D
300	300	200
500	500	200
600	600	200
900	900	200

Sizes are indicative only and can be customised to suit customer's requirements.

OPTIONS AVAILABLE

High Density	AVAILABLE
Variable depths	50, 100, 150, 200mm
