EGGKOOOL™

Fire Retardant Pads

EGGKOOOL™

Fire Retardant Pads

Some standard sizes:

- Depth: 4", 6", 8", 12"
- Width: 12"
- Height: 48", 60", 72"

Custom cut sizes
are also available

DRI offers evaporative cooling pads which are fire resistant and flame retardant. These **Fire Retardant Pads (FRP)** are incombustible. Such fire-resistant cooling pads are used in both commercial and Industrial Air handling units. Other applications for such pads are Gas turbine intake cooling, areas such as oil & gas facilities and chemical facilities.

These pads assist in complying with building codes and fire codes of manufacturing facilities / fire hazardous environments.

The substrate of **EGGKOOOL** fire retardant pads is a special inorganic glass fiber. Special incombustible products and product design ensure high efficiency, high cooling and flame retardant properties.

The **EGGKOOOL** Flame retardant pad is produced in an ISO 9001 certified manufacturing plant with a focus on evaporative cooling products. Such pads are also available in modules with water distribution system ready to plug into an AHU.

The pads are available in required sizes, flute heights and flute angle configurations such as 45/15 and 45/15.

Advantages:

- High saturation efficiency such as UL 900
- Low pressure drops
- High face velocity without carryover
- Suitable for hygienic applications
- No carry over of fibers
- Manufactured in an ISO compliant facility
- Tested in accordance with various required standards
- Additional test certificates are available covering fire, smoke and filter media
- Protective edge coating available
- Distribution pads available
- Easy maintenance
- Algae resistant, anti-bacterial properties
- Long life
